Closing the gap between emerging technologies and the government users who need them to innovate faster

BLUF: Ingenuity to Capability
Joint Innovation System

Members use the secured DOD deployment of VISION to discover, collaborate, and progress innovation and improvement solutions for mission critical joint branch initiatives.

VISION provides leadership the strategic data to advance projects and allocate resources while syncing initiative portfolios across priorities.
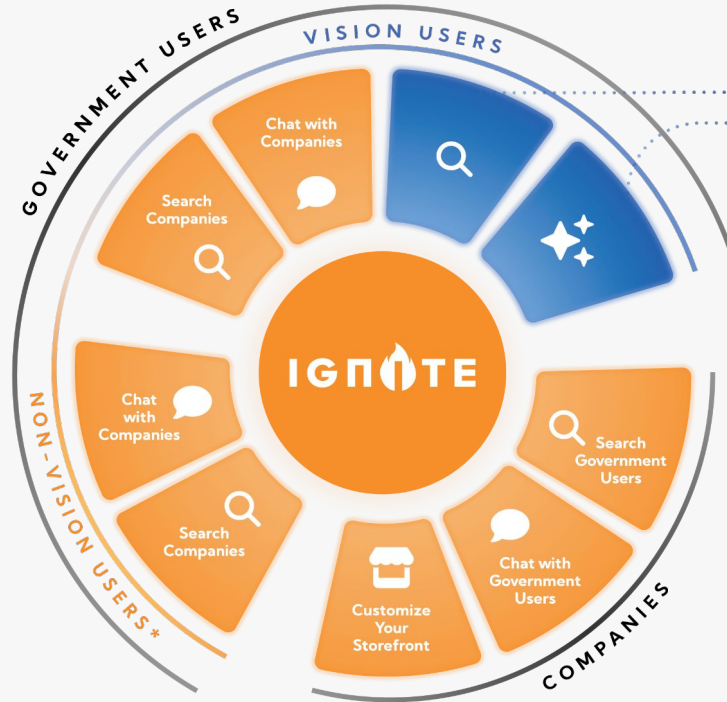

Government Users
Find emerging commercial technology solutions for innovation needs and accelerate concept to capability.

Small Business Users (Companies)
Make quality connections with government users who have clearly defined innovation needs (for free!)

*Non-VISION users include DoD users and other agencies that have SBIR/STTR programs
